# Veg-Tech Triple Ten™

1000 L Net

## APPLICATION RATES:

Crop	Foliar Spray Rate	Soil Applicaton
Greenhouse	1 L per 100 L water up to 2 L/acre, every 7 – 14 days	1 mL per plant, weekly

## INSTRUCTIONS:

**Stir well before use.** Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare. Sensitive foliage or plants should be test sprayed prior to full scale application. Frequencies are a guideline only and can be adjusted according to farm practices and/or in conjunction with crop monitoring. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility and spray test on small area before wide-spread use.

## IMPORTANT:

**Warning:** This fertiliser contains biuret, maximum 0.18%. Repeated foliar sprays may cause damage to citrus. For citrus use Citrus-Tech Triple Ten™. Avoid spraying close to harvest if produce is susceptible to staining. Not compatible with soluble calcium based inputs. Do not foliar spray until seedlings are 15 cm high.

**Note:** Product in 1000 L tanks may weigh over 1 tonne. Forklift with 2 tonne lifting capacity is recommended.

## SAFETY DIRECTIONS:

Keep out of reach of children. Avoid contact with eyes and skin. Additional information is listed in the Safety Data Sheet.

## STORAGE AND HANDLING:

Store in a cool dry area out of direct sunlight. This product has been tested to store safely down to 5°C. Crystallisation or sedimentation may occur below 5°C. Do not pre-mix or store in diluted form. Seal lid/cap immediately after use.
